

## **-CWC Logistics Park handles 2 BCN rakes simultaneously at its Nhava Sheva CFS**

### **Exim News Service**

NAVI MUMBAI, Sept. 13

HIND Terminals Pvt. Ltd (HTPL)-CWC Logistics Park container freight station (CFS) at Nhava Sheva has earned one more feather to its cap by simultaneously handling 2 BCN rakes recently—and that too in inclement weather! It also achieved another milestone by handling 75 rakes since November 2009.

In its continuous effort to facilitate a variety of services under one roof, Hind Terminals-CWC Logistics Park has developed 3 rail sidings at its Nhava Sheva facility, to handle container rakes as well as BCN goods rakes.

Hind Terminals has handled commodities like soyabean meal (DOC), rapeseed meal and maize through BCN rakes at this facility, which is being used by all major shippers and exporters for their bulk agri-commodity exports.

With export prospects of commodities like soyabean meal, rapeseed meal and maize looking up in the coming season, Hind Terminals-CWC Logistics Park is gearing up to manage increased volumes. Handling two rakes simultaneously is an endeavour towards this.

The success of this operation significantly enhances the rake handling capacity of Hind Terminals-CWC Logistics Park, which could reach as high as 50 rakes a month.

**WEATHER NO DAMPENERS: The rakes were efficiently handled despite the wet conditions**
